Industrial Cranes

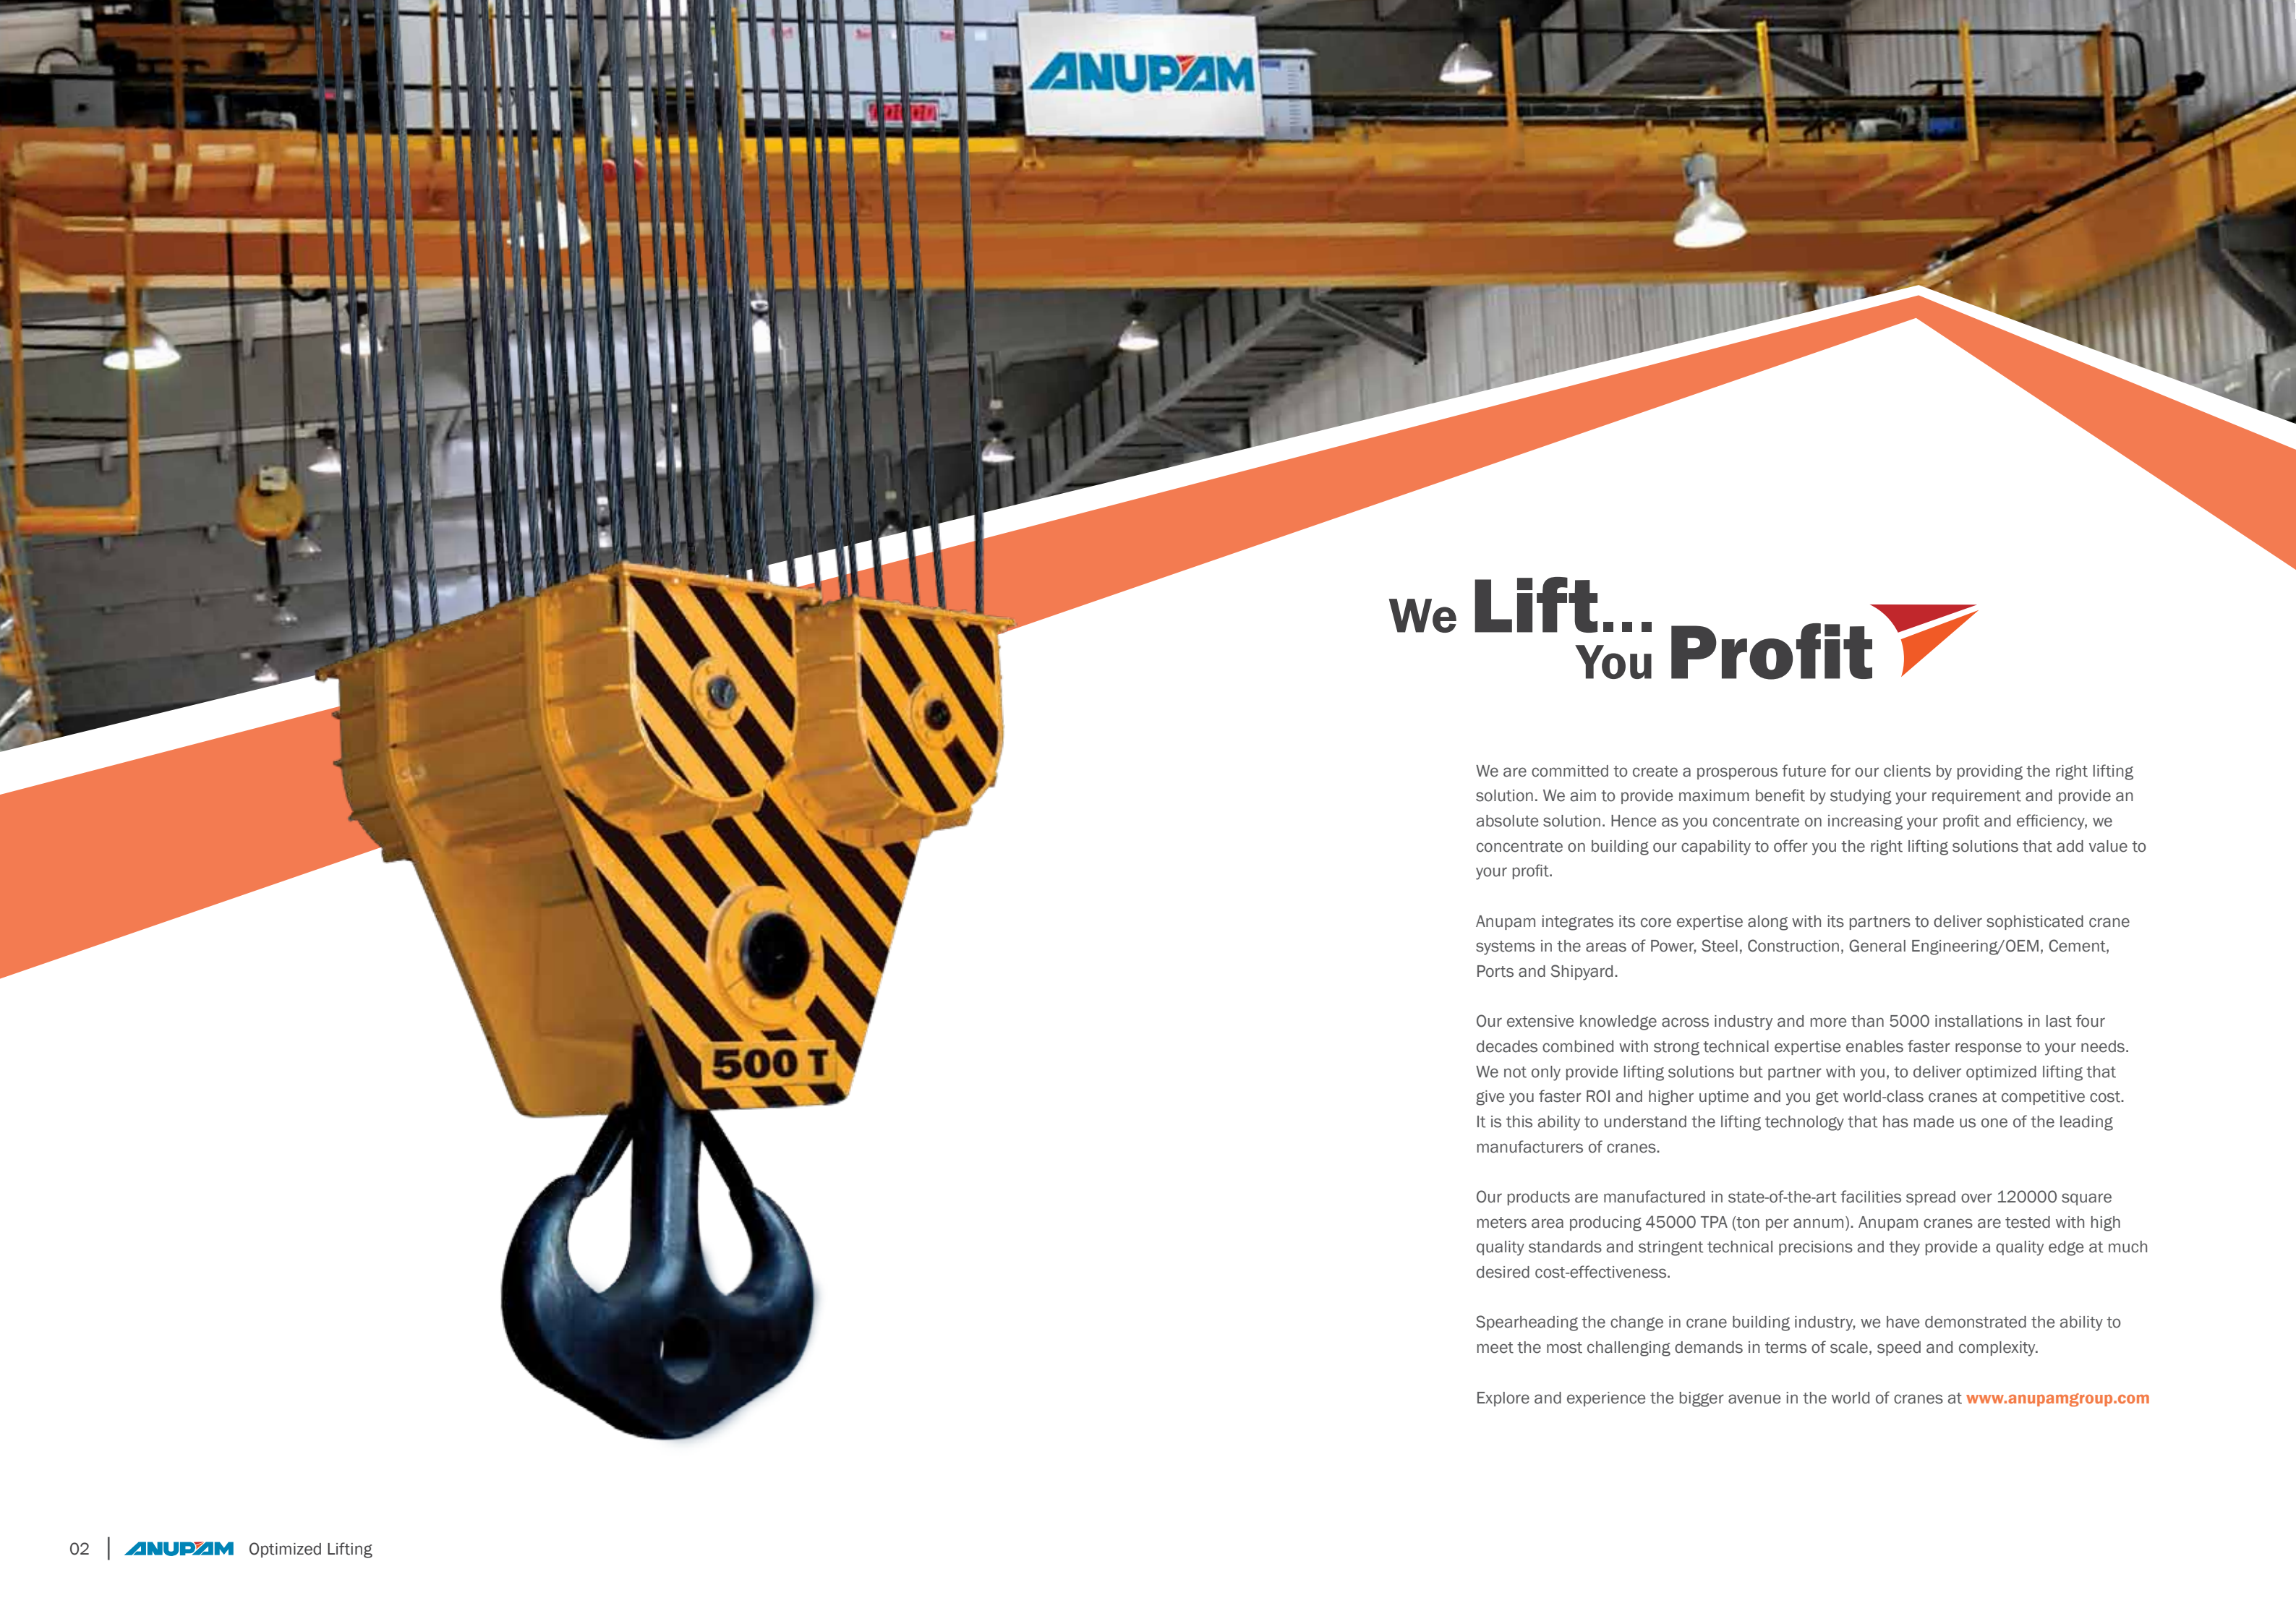

Construction Cranes

Standard Cranes

Port Cranes

A dramatic industrial scene showing a large crane lifting a glowing molten metal ladle. The ladle is bright orange and yellow with intense heat, and a large plume of white smoke or steam rises from it. The crane's cables and structure are visible against a dark background.

**We Lift...
You Profit**

We Lift... You Profit

We are committed to create a prosperous future for our clients by providing the right lifting solution. We aim to provide maximum benefit by studying your requirement and provide an absolute solution. Hence as you concentrate on increasing your profit and efficiency, we concentrate on building our capability to offer you the right lifting solutions that add value to your profit.

Anupam integrates its core expertise along with its partners to deliver sophisticated crane systems in the areas of Power, Steel, Construction, General Engineering/OEM, Cement, Ports and Shipyard.

Our extensive knowledge across industry and more than 5000 installations in last four decades combined with strong technical expertise enables faster response to your needs. We not only provide lifting solutions but partner with you, to deliver optimized lifting that give you faster ROI and higher uptime and you get world-class cranes at competitive cost. It is this ability to understand the lifting technology that has made us one of the leading manufacturers of cranes.

Our products are manufactured in state-of-the-art facilities spread over 120000 square meters area producing 45000 TPA (ton per annum). Anupam cranes are tested with high quality standards and stringent technical precisions and they provide a quality edge at much desired cost-effectiveness.

Spearheading the change in crane building industry, we have demonstrated the ability to meet the most challenging demands in terms of scale, speed and complexity.

Innovation

leading us **Ahead**

At Anupam we are constantly engaged in evolving technological innovation with a pioneering spirit. Innovation for us is a process through which we identify, create and perfect the technologies to develop products and integrated solutions that represent industry benchmarks for its quality and performance. Leveraging our strengths we always strive to meet our customers' requirements offering optimum productivity and maximum operating reliability at every stage.

It is this spirit of innovation coupled with advanced technology and engineering expertise that is helping us to stay at a spearheading position in the global marketplace. Maintaining this technological leadership and supporting the ideas of tomorrow we are designing new and better material handling solutions that are not only advanced and economical but sustainable and safe.

Partners in Progress

Anupam has formed strategic alliances with leading companies to leverage their collective strengths that add value to its product range.

ANUPAM-MHI

ANUPAM-MHI is a joint venture between Anupam Industries Ltd., India and Mitsubishi Heavy Industries Ltd. (MHI), Japan. Bringing together more than 50 years of experience in material handling segment, ANUPAM-MHI continues to thrive and innovate advance concepts and technologies in material handling.

A perfect blend of Anupam's manufacturing excellence, skilled human resources and MHI's technological and management expertise leads to production of high quality container handling cranes and bulk material handling equipment. Manufactured at state-of-the-art infrastructure, these cranes deliver high value at competitive pricing.

ANUPAM-ALFA

To meet the growing demand of building industry for high rise construction, we have associated with ALFA SRL, a FINALFA Group of ITALY to produce various types of Tower Cranes. With more than 40 years' expertise, ALFA commands the Tower Cranes market worldwide with its highly reliable range of Tower Cranes - ALFAMATIC, CITYMATIC, HYDROMATIC and SKYMATIC. With this association our clients get the most advanced technology in Tower Cranes and our expertise with most efficient solutions and services.

Precise Lifting for the **Power** Sector

Anupam is catering to the power industry with its advanced, precise handling and lifting solutions. Our cranes and components are specially designed to meet challenging requirements of critical installations and maintenance at power plants. Offering unmatched performance while assuring safe and reliable operations, our cranes are designed to tackle any challenges head-on. Our cranes are equipped with high responsive controls to ensure accurate positioning of heavy loads and equipment.

We hold the largest market share in domestic power industry for supplying TG Hall cranes and other customised cranes. More than 60,000 MW of power plants have been installed all over India and globally with our cranes. Constantly leveraging our extensive experience and advanced technology to upgrade our design capabilities, we are now able to offer cranes of more than 500T capacity. We have installed Turbine Hall and other customised cranes for:

- **Thermal Power Plants**
- **Hydro-Electric Power Plants**
- **Combined Cycle Power Plants**
- **Nuclear Power Plants**
- **Special Gate Handling Cranes for Hydro Power Plants**

For Nuclear Power Industry, we have developed a highly specialised Single Failure Proof (SFP) design for sensitive applications like radioactive material handling. Adhering to the stringent design and quality norms of Nuclear Industry, our cranes such as SFP cranes, FM vault cranes and other standard application cranes are a result of extensive experience and advanced technology.

We understand that regular care, maintenance and servicing are indispensable to ensure optimum performance at any power plant. Hence, our customer service team offer round the clock service to help our customers achieve higher uptime.

Safe and Secure **Steel** Solutions

Lifting applications in steel industry is faced with imposing challenges due to its unique environment and diverse needs. The crane systems deployed in the steel mills need to be highly flexible, sturdy and operate at a considerable pace to guarantee smooth, safe and efficient processes. With a profound knowledge about the industry and an experience that spans four decades, engineers at Anupam design and manufacture robust lifting systems that precisely address the exclusive needs of this industry and steel-making processes.

At the forefront of technology, we devise formidable, smart and integrated lifting systems that cater to different applications in steel plants. Our cranes and components are employed for heavy duty applications, with requisite temperature de-rating factor, applicable for steel plant environments and operations. We are also capable of manufacturing ladle cranes of 500T capacity and above.

With sustained focus on design innovation and research, we constantly monitor the emerging lifting needs in steel industry and hence come up with remarkable lifting solutions of highest quality built with a strong commitment to safe and sustainable production. Our astute and integrated systems assure safety, minimal downtime, reduced maintenance expenses backed by an efficient service team.

Our cranes are handling more than 20 million tons per annum liquid/hot metal and finished products and we have successfully installed different type of cranes for a variety of applications:

- **Hot Metal Handling Ladle Cranes:** Four Girder/Double Girder
- **Charging Cranes:** Four Girder/Double Girder
- **Casting Cranes:** Four Girder/Double Girder
- **Coil Handling Cranes**
- **Grabbing Cranes**
- **Scrap Handling/Magnet Cranes**
- **Finish Products Handling/Magnet Cranes:** Rotating Beam and Rotating Trolley
- **Steel Mill Duty – Auxiliary Cranes** for various steel plant applications.

Ladle/Charging/Forging Cranes (up to 500T)

Four Girder/Two Girder
Higher capacity on demand

Overhead Cranes (up to 500T)

Two Girder/Single Girder
Higher capacity on demand

Steel Mill Duty Cranes (up to 500T)

Customised cranes for
Auxiliary application
Higher capacity on demand

Gantry Cranes (up to 500T)

Customised cranes for
various applications
Higher capacity on demand

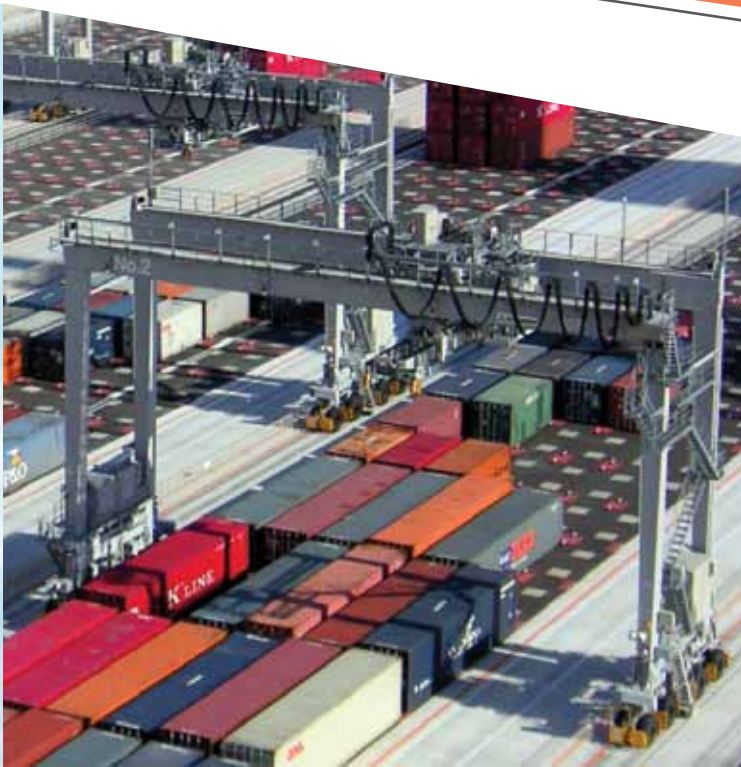

Portal/Goliath/Gantry Cranes (up to 500T)

Two Girder/Single Girder (full/semi)
Higher capacity on demand

Tower Cranes

CE Certified adhering to European safety
standards for high rise constructions

Container Handling Cranes

Rubber Tyred Gantry Crane

Bulk Material Handling Equipment

Grab Type Ship Unloader

Container Handling Cranes

STS (RMQC, RMGC) & RTGC

Electric Hoist &
Double Girder Trolley (Bi-rail)
(up to 50T)

Hassle Free Solutions for **Heavy Engineering** (OEM)

Anupam boasts an exceptional track record of manufacturing and supplying thousands of cranes with automated control technology to several General Engineering/Heavy Engineering/OEM sectors like shipbuilding, wind turbine, transformer, generator, boiler, pulveriser, cement mills, pressure vessels, pumps, heavy & special purpose equipment manufacturers.

Our manufacturing plants based in Gujarat, India, adhere to the global norms and are ISO 9001 certified. Empowered with state-of-the-art infrastructure, specialist expertise and thorough knowledge of this dynamic sector, we present a large variety of products and services designed to serve our customers' precise needs in the best possible way.

With long-standing experience and technology that matches global standards, our cranes are widely recognized for smooth mobility, safety, reliability and minimal space utility. Designed with automated control functionality, our tailored lifting systems and components assure long maintenance free life with finest performance.

Transcending Solutions for **Construction** Sector

Portal/Goliath/Gantry Cranes

We design and manufacture Portal/Goliath/Gantry cranes as per our customer requirements for various construction and industrial applications like shipbuilding, infrastructure, power, material handling and water gate handling. Depending on the application and customer requirements, we design these cranes as single girder or double girder of up to 500T capacity.

India has witnessed a meteoric rise in the infrastructure sector in the past few decades. Anupam cranes have made a major contribution in this growth. Offering reliable performance backed by state-of-the-art technology and a variety of proven features, Anupam cranes are designed to suit challenging applications on any construction site. Setting the standard of excellence in performance, manufacturing, quality and service; we at Anupam remain committed to a total customer satisfaction in all aspects of our business. This is reflected in the number of repeat orders we receive from reputed customers, who have relied on our cranes for many years.

Tower Cranes

Our association with the leading European tower crane manufacturer – ALFA SRL of Italy, has placed us in a strategic position to provide extensive range of tower cranes for the ever growing building industry with high rise constructions across the globe. Tower cranes manufactured by ALFA, are not only acclaimed worldwide as the best, but represent the synthesis of the most advanced technology in tower cranes. ANUPAM-ALFA tower cranes are CE certified adhering to the European Safety Standards.

Advanced Handling Solutions for **Ports**

We have joined hands with Mitsubishi Heavy Industries, Ltd. (MHI), Japan to manufacture port & container cranes and a wide range of material handling equipment and system. MHI is one of the world's leading manufacturers of cranes with annual revenue of over US \$ 40 billion, manufacturing over 2,450 complete cranes all over the world.

We provide world-class container handling crane solutions - Rail Mounted Quay Cranes (RMQC), Rubber Tyred Gantry Cranes (RTGC), Rail Mounted Gantry Cranes (RMGC) and Bulk Material Handling Equipment - Grab Bucket Ship Unloaders & Continuous Ship Unloaders.

With more than 50 years of expertise in this field we continue to develop and innovate advance concept technologies to ensure higher uptime at a highly competitive price. Our crane structures and mechanisms are designed with the most modern, reliable and advanced software at MHI, Japan and are manufactured in two state-of-the-art manufacturing facilities based at the western part of India - Inland manufacturing complex spread over 300,000 sq.m area, an ultramodern manufacturing set up and seafront assembly facility on 120,000 sq.m area with a dedicated load-out jetty for roll-on/roll-off operations. Our cranes are tested with high quality standards and stringent technical precision. These products provide a quality edge and the much desired cost-effectiveness.

Customer **Service**

Customer Service is one of the key aspects that drive our major attention. At Anupam, we understand that business objectives and growth rely on the smooth operational and manufacturing processes. An efficient operation with minimal downtime gives your business a competitive edge.

We have a team of dedicated engineers and service personnel to provide maintenance and support solutions in order to optimize your processes and resolve any downtime issues. Right from manufacturing and installation to after-sales service and support, we assure smooth operational flow to enhance your productivity.

Forging **Forward** The **Responsible** way

We follow a comprehensive approach to corporate social responsibility that exists at all levels of our organization and every area of activity. While we excel at manufacturing world-class cranes, we remain committed to do so sustainably and forging forward the responsible way.

Education

With a firm belief that education leads to empowerment and self-reliance, the company has been sponsoring educational aids to economically and socially under-privileged students at the rural schools and engineering colleges. We recruit and train socially backward students, empowering them with specialised skills while improving their employment potential.

Health

To ensure that even the poorest section of people receive best health facilities, Anupam continuously sponsors the treatment of curable blindness at Sankara Eye Hospital, Anand. The Sankara Eye Hospital carries out eye surgeries which provide a new lease of life to the deprived patients.

Safety

Health and safety form an integral part of Anupam's business activities. We strive for zero work-related incidents and place maximum importance to safety of our employees. We are also committed to operate in accordance with the highest standards in terms of labour practices and human rights.
